Subject: Microsoft Settlement,

To who it may concern,

The suite, against Microsoft should not have happened,at all.

The suite was not in the best interest,of the general public,and the government,businesses, of all kinds,earthier.

It is not Microsofts fault, that they are way ahead of there competitors,and get there product on the market, before the others do.

If it had not been for all of the smart people,at Microsoft , in getting there technology,in the soft wear world,where would we all be today,with our computers etc.,

if we had to wait on the other soft wear people, to get the products on the market to us?We would be years behind,in getting this soft wear, for our computers.

The suite, against Microsoft was just a way for a lot of people to get there hands on money,that they DID NOT EARN,because they were so far behind in there planning and thinking, that they could not keep up,with the smarter people, that Microsoft had the smart to hire, that was superior people in laying out the programs, for Microsoft.

So get off of your DUFFS,and throw out this OUTRAGEOUS SUITE, for it has cost everyone a price,in some way, and it is stupid.

I do not think, that you should punish anyone, for there progress, just because the others, are not SMART ENOUGH to keep up.

The faster that we can get, the kind of products,that Microsoft brings to the market place, the more it helps all of us, to advance, faster in the growth of our businesses,so we can get our products to the market place faster and cheaper, and that saves us all money, and can have a larger turn over, and maybe put more people to work,which puts more money in the hands of more people to have more buying power,for there families,and that is what keeps our economy turning,at a safer, and easier pace.

For the betterment of our Country, and all the people,Throw the thing out, and DROP All Charges,and get back to Business, for this thing has not only cost Microsoft a lot of money,but also all of the people, that use and need there kind of products,and will just drive the price of the products up, to the people because of the cost, of all of the special interest people,trying to make a fast buck,off of some one elses progress,because it is just like all of the BULL,that was brought on the Tobacco Industry,and has cost us all dearly, in higher prices and TAXES and the money made on that deal, never ends up in the hands of the hospitals,etc.,to treat sickness so called cause of some of the peoples sicknesses.

What kind of Bull are we going to come up with NEXT,that will cost the people,while it makes all of the Lawyers and others RICH.

So DROP It.

Sincerely,

Billy J. Fite
